

## **Unsolicited Testimonial on Radionics Training by the Radionics & Dowsing Institute of Canada.**

The claim that the practice of Radionics in North America is different from that in Europe is highly justified. The Radionics & Dowsing Institute of Canada has de-mystified Radionics in a number of ways by doing away with stereotypes. Here are some examples:

- 1) **On Training:** The Association places a high premium on intensive training as the basis for understanding the theory and practice of Radionics instead of merely selling instruments. The Radionics Association of Great Britain for instance, offers weekend courses in Radionics which may be of some value to residents in the United Kingdom; but totally inappropriate for overseas students. On the contrary, The Tutored Home Correspondence Course of the Institute is well structured, well organized, convenient, cheap and available worldwide without compromising its technology, ethics or sensitivity.
- 2) **On Dowsing position:** Some radionic practitioners I know here in Nigeria and elsewhere swear by the traditional method of holding the pendulum on a fully outstretched arm and extended elbow, neither bending the elbow nor placing it on the table. The Association has shown this to be a myth and there is no scientific reason why the elbow cannot be bent or even placed on the table to prevent fatigue while dowsing.
- 3) **On Radionic rates:** Through the Association the diversification and the continuing expansion of radionic treatment options are available since radionic rates are NOT presented as *sine qua non* for treatment. Also there is the added liberty and justification for constructing 'own rates' and modifying existing ones where necessary.
- 4) **On Holistic healing:** Very importantly, The Association has introduced other healing modalities including *Names of God*, *Sanathana Sai Sanjeevinis*, *Oriental Herbology*, *Words of Power*, *Radionic Astrology* and *Radionic Acupuncture* to mention a few. Since these healing options may, to a greater or lesser degree, work at different levels of the human energetic anatomy, it means that the likelihood of achieving a more holistic healing for the client is truly enhanced.
- 5) **On Spiritual growth:** Furthermore, The Association trains on and practices holistic care paying attention not only to the subtle bodies, but also to the social, economic and spiritual health of the total being. It also offers accelerated spiritual growth and development information especially for the practitioner over and beyond the innate growth of the intuitive faculty offered by radionics discipline and practice.

The Association has in other ways, contributed positively to the growth of Radionics:

- 6) **Comparative studies in Radionics:** Through the critical analysis and comparative studies of Radionic procedures, claims and instruments from various sources, The Association is able to identify best radionic practices, treatment principles, methods and instruments; and by so doing helping the Radionic practitioner to make informed decisions and choices. Therefore The Association has shown that the more sophisticated and expensive radionics instruments available in the market, do not necessarily translate into increased efficacy and excellence. In fact the basic Radionics CHARTS as organized/designed/developed and applied by the Institute allows for a far more rapid, efficient, flexible, dependable and cheaper analysis.
- 7) Here, I will share my early experience in Radionics as it relates to **Copen Mk 7 Radionic Computer & Copen MARS III:**
- a. Initially I was frustrated and my interest in Radionics nearly 'killed' by using Copen MK 7 Radionic computer because of obvious inconsistencies in analyses results. It would have been a total disaster had I gone ahead to buy the Copen MARS III, which I thought would be easier to operate in spite of its exorbitant cost.
  - b. My attraction to Copen MARS III (or the Multiple Analytical Radionic System III) was its incorporation of VIBA (Vast Interactive Bio-system Analyzer) which allowed radionic analyses to be carried out **automatically**.
  - c. *"The concept of VIBA is that a random selection of rates from the database (stored in the computer and) superimposed with the information from the scanned patient is INFLUENCED in such a way BY THE CONSCIOUSNESS OF THE USER, that the result is a meaningful reflection of the patient's state of health"* (words in italics and bold emphasis are mine).
  - d. In view of my training with The Institute, I can now surmise that **'the influence of the consciousness of the user'** may not be as simple and straightforward as it is stated. Since a high degree of subtle energy sensitivity is definitely required to operate even the MK 7 Radionic Computer, I suggest that an ULTRA HIGH degree of sensitivity will be needed to operate the computer assisted MARS III.
  - e. Given the speed at which computer programs run, I further suggest that the speed of consciousness of the practitioner must necessarily exceed that of the MARS III computer in order to maintain control and direction on its decision-making path. How many Radionic practitioners possess this degree of super conscious sensitivity at this time to guarantee such an analysis? Therefore, the superimposition of an ultra high sensitivity of consciousness must be the critical factor in any method of computer-assisted radionic analysis; otherwise the analysis result is simply a mundane random selection of data which any computer can throw up; and such would be devoid of the intuitive/spiritual/consciousness overlay, guidance and direction which *IS* the very essence of any radionic analysis.

- 8) Frankly, I cannot understand how any Radionic practitioner whether a newcomer just off the street or an old timer can practice this healing science and art without undertaking the Radionics Home Study Course offered by The Radionics and Dowsing Institute of Canada. Simply stated: THE COURSE IS PRICELESS! This Canadian Institute is in reality, a very ADVANCED School of Dowsing & Radionics.
- 9) **2007 – Catalogue:** I was so impressed by the thoughtful organization and layout of a very complicated 2007 - Catalogue of the Institute that I converted the layout into a schema which I called “*Layout of Radionic & Dowsing Elements for Analysis, Treatment & Professional Guide*” (see the figure below). It is based entirely on the contents of the catalog. The arrangement showed me at a glance, the interrelationship of the numerous catalog elements serving as a quick reference guide. If you consider that the schema could enhance the quality of the catalog, you may undo the colors and incorporate in a new catalog edition.
- 10) **Dr. Robert McFarland:** I wish to commend Dr. Robert McFarland for those very incisive taped lectures with a world of information using a scientific approach in discussing very esoteric topics. Truly, the wide range of lecture topics added value to the training course. They further opened up my understanding of life.
- 11) **Shirley Clark:** I must pay special and glowing tribute to Shirley Clark, my e-tutor and Executive Director of the Institute. She guided my training with patience and loving intent; giving sound technical advice, never spoon-feeding me even in the difficult early, formative days of training. Over 2 years later, I am the better for it.
- 12) Finally, one of the greatest lessons I have learnt in this course is that Radionic therapy while seemingly addressing dis-ease states, is in fact a step no matter how small, in energetic intervention to assist the client re-discover the God-within through harmonization of discordant spiritual energies resulting in bio-spiritual evolution and ascension. For me this is the ultimate goal of holistic healing.
- 13) Thank you.

**Dr. Jones Utuk**
